Developmental milestones for babies:

During the first year of life a baby will grow and develop at an amazing pace. It is important to remember that no two babies are the same and so they will all develop at their own pace in their own time. If a baby is ahead in one area of development, it will often mean that they will lag behind in another area as they are busy perfecting the skill they are working on at the moment. Developmental milestones are just a rough guide as to approximately when your baby should be able to do various things in a particular time frame. What can be helpful is to look ahead and see what the next milestone should be and encourage your baby to start doing that next activity. If you are concerned about your baby's development at any stage, trust your gut instinct and go and speak to your healthcare provider and have your baby assessed by a professional. When looking at the development of a premature

baby, you will take into account their due date and not their actual birth date and work around that date.

Postings to this site and electronic mail delivered to Kimberly-Clark are not confidential and Kimberly-Clark shall not be liable for any use or disclosure thereof. All communications and other materials (including, without limitation, unsolicited ideas, suggestions or materials) you send to this site or to Kimberly-Clark by electronic mail are, and shall remain, the sole and exclusive property of Kimberly-Clark and may be used by Kimberly-Clark for any purpose whatsoever, commercial or otherwise, without compensation.
